Claims 1 – 24 (Cancelled)

Claim 25. (currently amended) An electrochromic laminate comprising the steps of:

- a. ~~made by~~ placing sealing material around perimeter of an electrolyte sheet positioned on a first substrate;
- b. covering the sheet with a second substrate that extends over the sealing material; and
- c. subjecting both the electrolyte sheet and the sealing material to simultaneously applied heat and pressure to adhere said solid electrolyte sheet with said first and said second substrate.

Claim 26. (original) An electrochromic laminate as in claim 25 which is impact resistant.

Claim 27. (original) An electrochromic laminate as in 26 which reduces sound transmission at least 3dB.

Claim 28. (new) An electrochromic laminate as in claim 25 wherein said electrolyte sheet is a solid electrolyte.

Claim 29. (new) An electrochromic laminate as in claim 28 wherein all of the electrochromic activities take place in said solid electrolyte sheet.

Claim 30. (new) An electrochromic laminate as in claim 28 wherein said solid electrolyte sheet is situated between an electrochromic layer and a transparent conductor.

Claim 31. (new) An electrochromic laminate as in claim 28 wherein said solid electrolyte sheet is situated between an electrochromic layer and an ion-storage electrode.

Serial Number: 10/623,869

3

Claim 32 (new) An electrochromic laminate as in claim 31 wherein said ion-storage layer may also exhibit electrochromic properties.
